SUMMARY

Software Engineer specializing in scalable, user-centric web applications with high proficiency in the React, TypeScript, and Tailwind ecosystem. Proven ability to bridge the gap between complex UI/UX requirements and high-performance front-end architecture. Experience driving full-stack development lifecycles in Agile environments, from initial wireframing through API integration to production-ready delivery.

SKILLS

TECHNICAL SKILLS

- Programming Languages:** JavaScript (ES6+), TypeScript, PHP, HTML, CSS
- Front-End Architecture:** React.js, React Native, Tailwind CSS, Bootstrap
- Back-End & Data Layer:** WordPress, MySQL, Firebase, RESTful API Design & Integration
- UI/UX Engineering:** Figma-to-Code workflows, Wireframing, Interactive Prototyping
- Engineering Tools:** Git-based version control, VS Code ecosystem, Agile/Scrum task management
- SEO & Content Strategy:** Semantic HTML structure, high-performance web optimization, data-driven content strategy

SOFT SKILLS

- Detail-Oriented, Team Collaboration, Problem-Solving, Adaptability, Clear Communication, Time Management

EXPERIENCE

Web Developer & UI/UX Designer Intern | Rafael IT Services

2025 – 2026

- Spearheaded the design of high-fidelity wireframes and interactive prototypes in Figma, facilitating five design review cycles that reduced client revision time by 30% and ensured 100% client alignment.
- Developed and optimized a responsive WordPress front-end, achieving a 25% increase in cross-device accessibility scores and reducing layout-related user bug reports by 40%.
- Implemented data-driven SEO strategies, increasing organic search visibility by 20% and boosting page traffic by 15% within three months.
- Partnered with cross-functional teams to translate complex goals into functional designs, contributing to a 15% increase in client satisfaction scores.
- Facilitated team workflows using Agile methodologies, accelerating project delivery timelines by 10% and maintaining a 100% on-time completion rate.

Data Entry | 7-Eleven

2023 – 2024

- Digitized high-volume receipt records into Excel, improving financial tracking accuracy by 25% and increasing data entry output speed by 20%.

PROJECTS

Virtual Art Gallery System | UI/UX Designer, Front-End Developer & Project Manager

- Directed the end-to-end development of a responsive art gallery platform, reducing page load times by 20% using React and Tailwind CSS and achieving all project specifications by the target deadline.

Burger Recipe Application | UI/UX Designer & Front-End Developer

- Designed and built a mobile-first recipe app, integrating third-party APIs for real-time data delivery that increased user engagement by 15 percent during testing.

Jewelry Photo Editor Website | UI/UX Designer & Front-End Developer

- Engineered a custom WordPress platform, implementing SEO best practices that drove a 30% increase in organic search traffic for professional editing services.

To-Do List Web Application | UI/UX Designer & Developer

- Developed a task management tool with core CRUD functionality, optimizing back-end PHP logic for reliable, bug-free performance across all user-driven task operations.
